Commissioner for Patents

**RESTRICTION**

**Notice to Applicant(s)**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 25-46, and 50-58, drawn to a vehicular diagnostic method and system, classified in class 701, subclass 29.
  - II. Claims 47-49, and 59-61, drawn to a communication center, classified in class 379, subclass 49.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because: invention II related to a communication center. The subcombination has separate utility such as: invention I related to a vehicular diagnostic method and system.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dalena Tran whose telephone number is 571-272-6968. The examiner can normally be reached on M-W (in a first week of a bi-week), and T-R (in a second week of bi-week) from 7:00AM-6:00PM.
